 Creative Performance: The Nest – A place of creative nourishment
 Words you used: permeable, ease of access, comfortable occupation
 The idea of permeability links to flexibility. The openness of your structure is appealing. You should think of all planes – roof, floor and wall to make these spaces nourishing and comfortable and also possible flexible in use. Sometimes the spectators to the creative performance might sit on a big floor plane and sometimes on a small one. In other words there does not have to be a set “stage” – that could move as the need requires.
A permeable space that encourages flexible use for creative performance
